

CASE STUDY

Transystems, LLC Renville, MN

COMPANY OVERVIEW

Transystems, LLC is a bulk commodities transportation company operating in the midwest and western U.S. The Renville, MN

location is mainly involved in the transportation of sugar beets between September and April.

CHALLENGES

The majority of Transystems work takes place in the winter months, frequently off-road. During this time the vehicles operate on an almost continuous basis with little time for PM.

- The extreme operating conditions leave vehicles prone to frozen brake lines
- Frozen air brake systems lead to vehicle downtime and production delays
- The cost to the company of a downed vehicle is estimated at \$200 - \$800 per incident

SOLUTION

The Expello Automatic Drain Valve removes moisture, oil and other contaminants from compressed air systems every 5 minutes of vehicle on time.

- Easy to install, it takes about 20 minutes to complete
- Regular 5 minute purge cycle
- Thermostatically controlled heater
- Maintenance free, durable construction

RESULTS

After a successful pilot program Transystems outfitted the entire fleet of tractors at the Renville location, they are now adding Expello ADVs to their trailers.

- INCREASED PRODUCTIVITY
- INCREASED EFFICIENCY
- ELIMINATED FREEZE UP
- INCREASED UPTIME
